

Electrical

Q: Why can't I do my own electrical work in my home?

A: The Village Code states that a license electrician must be hired for electrical work in order for the NYS Underwriters to certify the work performed by the electrician.

Q: Do I have to take out an electrical permit with the Town?

A: No, but the Village requires the electrician be licensed with the Incorporated Village of Manorhaven before starting any work.

Q: How do I find a company that is authorized to issue an Electrical Underwriter's Certificate?

A: Your licensed electrician should be able to direct you to an Electrical Underwriting Agency.
